PARTIES AND THE TARIFF. In their efforts to reduce the tariff the memhers of the free-trade wing of the democratic party have suffered a defeat. The party could not be united on the measure. Selfishness, personal and local, is at the bottom of protection; and of this selfishness the democratic party has a large share. Partisan interests also come in serve undimmed the lastre of his great fame. to control the votes of members of congress. Thus, the democratic members from the manufacturing states were made more resolute in their opposition to the Morrison bill by their that the tariff ought to be reduced voted against the Morrison bill because they thought that

championship of protection would be a good

There is no doubt that the republican party will take up the flag of protection as its standard will take up the flag of protection as its standard for the presidential straggie: and it looks now as if the democratic nearty would follow solve. as if the democratic party would follow activey or passively the republican line of march. Very probably the tariff discussion, now virtually emocratic convention at Caicago; but under pressure of a common desire for success a plutthe proteolion states a protection document. Will this succeed? The free-trade members of democratic party say it will not. One of their ablest organs, the Haltimore Sun. puts the case in this way: • "The republican party has passessed the patent republican party has possessed the patent right to each and every advantage which may tion in affairs. He is a man of action rather ensue from the advocacy or enforcement of pro-tective doctrines. It has entrenched itself to strongly to be dislodged in the affections of every grade of the manufacturing the object of their interest and benefit. With individual exceptions too insignificant to be noticed, no fact is better known than that at all national elections the industrial classes, who imagine that their welfare is bound up in a protestive tariff, march solidly to the polls and vote the republican tible. This they will continue to do until the day comes when they are convinced of their things done," rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward rather than upon what he is that his consolous support is outward. His enjoyment depends in an order than upon the form of the locus to the form of the bour of silent than upon the bour of silent thought sand of their locus and Yambill.

PREATER RESISTER ROBERT every grade of the manufacturing and opera-tive classes, who delude themselves with the

ful issue upon tariff reduction for the presidential election of this year. The issue on this question is an issue of the future. The repub-lican party will not always majerain high tariff posed to hold to them as an expedient for the political contest now at hand, rather than as a notice to be adhered to permanontly. The last congress, which was republican, made countierable tariff reductions, and among republicans in the present congress there would be a far readier disposition to pursue this policy had not full to bring him in the humilating competition with men whose minds are sharpened by Wall street experiences to the keenest scent for in the present congress there would be a far readier disposition to pursue this policy had not the democrats of that body taken it up and only as the dray horse in Berlin, which understood the thorse house in care to be away and only as the dray horse in Berlin, which understood the thorse house in care to be away and only as the dray horse in Berlin, which understood the thorse house in care to be away and only as the dray horse in Berlin, which understood the thorse house in care to be away and only as the dray horse in Berlin, which understood the third house in care to be away and only as the dray horse in Berlin, deferment driver is such dot his in return for from an instant. in the present congress there would be a far readier disposition to pursue this policy had not the democrats of that body taken it up and proclaimed it as their own. This whole bisisproclaimed it as their own. This whole business is simply a skirmish for advantage in the ness is simply a shirmish for advantage in the presidential election, and each party is acting with this idea as the sole thing in view. But the future certainly will bring a change in the attitude of parties toward this question. We quote again from the journal above named: "If the democratic leaders do not rise to the occasion the democratic leaders do not rise to the occasion."

The old whig cessor is a Mr. Canon, from Stillwater, Minneparty Fried to underbid the democratic party sola, the town where Senator Sabin resides and for pro-slavery support, and to this end made presumably a discovery of the senator. It will itself as like the democratic party as it could, be gratifying to the country if he should turn only to be apurned at the south for imposture and denounced at the north for went of fidelity iciple. So now, as the republican party is "on the inside" upon the question of protec-tion, the democratic party by trying to get inside with it will excite the dieguat of the low tariff men on the one hand and of the highiariff men on the other. We have a big so try, but big as it is there is room in it for only one protection party at a time.

H. Gest al Cant could win on the battle fields of the north, but he could not win against the stock jobbers of Wall street. His failure reminds one of the fine lines in the "Merchant of Venice," in which the here who had won bloodly fields from Sultan Solvinan laments the fate the pele him to a contest for the fair Portia on terms that made the weakest rival his equal:

The solicitude which has been expressed in all parts of the country for his continued health, shows that The people have a tender spot in their hearts for the here of Appemattex. If he should now trust his fame entirely to the care of the mass; s of his countrymen, it would grow no more dim. At the same time we appreciate the circumstances which runder it difficult for a man like and Jefferson, who found enjoyment in a life of comparative seclusion and freedom, and it was therefore more difficult for him to sustain himself white anemployed in that true dignity which "abides with him alons who to the himself." As the case new stands the democratic party is on the borns of a dilemma, either of which is itable to pieces it. It cannot beat the republished personal marry in bidding for the protection vote and it can now scarcely hope to make a successful issue upon tariff reduction for the president of the process of the process of the protection with the same of the protection with the same of the protection with a protection with the protection with the protection with the protection with a protection with a protection with the protection with a protection with the protection with the protection with a protection with the protection with a protection with the protection with a protection with the form the provided with the form the protection w of the men he gives it to. Almost any man can be some of the future. The repulsion party will not always maintain high tariff inciples, because it cannot. It is now dissent to hold to them as an expedient for the litical contest now at hand, rather than as a litical contest now at hand, rather than a litic superior to the American traveler who only knows his native language.
